SPARK FM ONLINE

THE PEOPLE'S STATION

**#1 FOR URBAN &
CARIBBEAN MUSIC**

@SPARKFMONLINE

At Spark FM we provide relatable news that directly correlates to the people, places and things in the urban community. Providing programming that matters on topics that are important to our demographic: education, politics, personal and generation wealth, entrepreneurship, and entertainment.

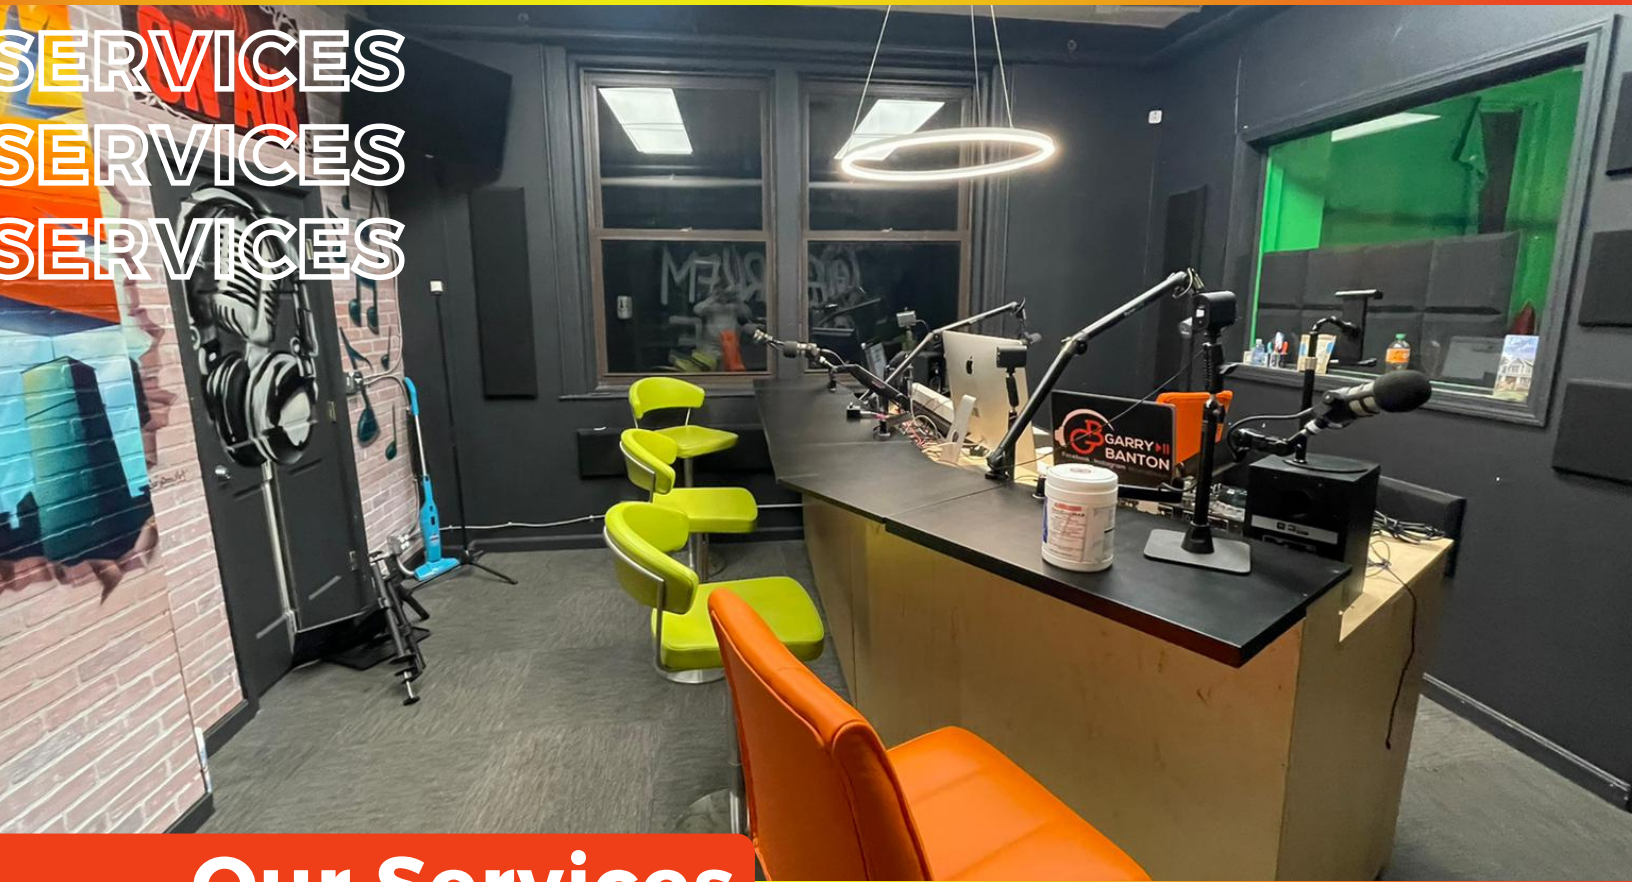

Who We Are

Spark FM Online is a digital radio platform that was created to empower and amplify the underserved voices of the community. Based in Boston, MA our station provides a local and professional platform where DJ's, personalities, and artists have the unique opportunity to create their own messaging, mixes, and music, while engaging listeners on both the neighborhood and national levels.

What We Do

Spark FM allows local business owners, and corporate entities located within our targeted communities to advertise and promote their businesses in an affordable and accessible way. This station is "logistically local" but has a global impact as a legal, professional, local market alternative to mainstream media. We invest in the community by way of community events, live remote broadcasts, and community sponsorships.
